As of FRI 23 AUG 2024

### PARALYMPIC COMPETITION FORMAT

#### Events

The powerlifting competition at the Paris 2024 Paralympic Games consists of 20 medal events:

MEN (10)	WOMEN (10)
up to 49kg	up to 41kg
up to 54kg	up to 45kg
up to 59kg	up to 50kg
up to 65kg	up to 55kg
up to 72kg	up to 61kg
up to 80kg	up to 67kg
up to 88kg	up to 73kg
up to 97kg	up to 79kg
up to 107kg	up to 86kg
over 107kg	over 86kg

A total of 180 athletes may take part in the powerlifting competition. This figure comprises 80 male and 80 female athletes, plus 20 bipartite commission places.

### SPORT RULES AND PROCEDURES

All athletes have three attempts to record their heaviest lift successfully against the others in their bodyweight category. Lifters complete each round in the order of the lowest lift weight requested to the highest, and when the requested lift weight is the same, by descending lot number order.

All athletes have two minutes to start their lift from the time their name is called by the official announcer. In the third round, two weight changes are allowed. Athletes can take the bar from the rack themselves or with assistance from the chief spotter loader or a coach.

When lifters have the bar under control, they must wait until they receive the "start" command from the chief referee. Then they must lower the bar to their chest, hold it motionless then press it upwards to arms' length with locked elbows and hold the bar under control until the chief referee gives the "rack" command.

A lift attempt judged as compliant with the technical lift sequences requires the decision approval by at least two of the three referees. This is signified by the white icon on the attempt board. Three referees judge the lift; two or more white lights are needed for a good lift and two or more red lights for a no lift.

Before the first round, the attempt weight can be changed by increasing or decreasing the original weight by a maximum of 10kg (but not lighter than a minimum weight of 25kg) until five minutes before the start of competition.

If an athlete's third attempt is judged a "good lift" and the weight is within 10kg of a current eligible record, a power lift (fourth attempt) is allowed.

## Competition Format and Rules

Format et règlement des compétitions  
As of FRI 23 AUG 2024

### Weigh-in

The weigh-in is the official process to verify the athletes' final bodyweight to confirm that the athletes are within the necessary parameters permitting them to compete within their selected bodyweight categories. During the weigh-in, the athletes or their coaches must declare a starting weight and rack height.

### Competition rules

The powerlifting competition will be held in accordance with the editions of the following documents that are in force at the time of the Games:

- The official World Para Powerlifting Rules and Regulations version 1.4 2022 (available at [www.paralympic.org/powerlifting/rules](http://www.paralympic.org/powerlifting/rules))
- The IPC Handbook (available at [www.paralympic.org/the-ipc/handbook](http://www.paralympic.org/the-ipc/handbook))

World Para Powerlifting (WPPO), working with Paris 2024 competition management, will be responsible for the technical control and direction of the powerlifting competition at the Paris 2024 Paralympic Games.

### DIFFERENCES BETWEEN THE WORLD CHAMPIONSHIPS AND THE PARALYMPIC GAMES

At world championships, each National Paralympic Committee (NPC) may enter up to 10 athletes for the women's competition and another 10 for the men's competition, but there must not be more than two athletes from any country in the same bodyweight category.

At world championships, more than 400 athletes from more than 70 NPCs compete and there is extra medal events (men's, women's and mixed team). At the Paralympic Games, 16 athletes per NPC (eight men and eight women) may receive a direct qualification slot, but only one athlete is allowed for each NPC in each bodyweight category. At the Games, 180 athletes from about 60 NPCs compete.

At the Paralympic Games, it is possible to break only two types of records and have those records count towards the final results and medal rankings:

- Elite world record
- Paralympic record

### CHANGES SINCE THE TOKYO 2020 PARALYMPIC GAMES

- Athletes will be allocated lot numbers according to the Paralympic ranking list per bodyweight category in ascending order; i.e. an athlete ranked first will be allocated lot number one and so on.
- Weigh-in will take place one day before the respective event.
- A random weigh-in may take place on the morning of the event. If an athlete's weight is outside the allowable percentage of their bodyweight category (as published in the teams manual), the athlete will be disqualified from their event.
- The kit check will be completed in ascending order of the first attempt weight declared at the weigh-in, from the lowest to highest in each respective group.
- Before the first round, the attempt weight can be changed by increasing or decreasing the original attempt weight by a maximum of 10kg (but not lighter than the minimum weight of 25kg) until five minutes before the start of competition.

## Competition Format and Rules

Format et règlement des compétitions

As of FRI 23 AUG 2024

- The minimum weight increase is 1kg. At Tokyo 2020 and previous Games, the minimum weight increase was 0.5kg.
- At Paris 2024, the weight lifted by an athlete during the power lift will count towards their final result. At Tokyo 2020, the power lift was only for record purposes and did not count as the final result.
- At the Paralympic Games, the WPPO recognises records for all age groups as follows if it was broken within three lift attempts:
  - Elite world record
  - Paralympic record
  - Rookie world record
  - Next Gen world record
  - Legend world record
- Tiebreaks will be determined by the athlete who completed the winning lift first.
- Athletes have the opportunity to challenge their own lift through a “lift challenge” if the lift received a “no lift” decision via the video review system.

### DIFFERENCES FROM THE OLYMPIC GAMES

There is no equivalent sport for powerlifting at the Olympic Games.

For further information, please consult: [www.paralympic.org/powerlifting](http://www.paralympic.org/powerlifting)

### Competition Schedule

## Sport Terminology

Terminologie du sport

As of FRI 23 AUG 2024

Term	Definition
<b>Ataxia</b>	An eligible impairment for powerlifting; lack of coordination of muscle movements due to a neurological condition, such as cerebral palsy, brain injury or multiple sclerosis.
<b>Athetosis</b>	An eligible impairment for powerlifting; generally characterised by unbalanced, involuntary movements and a difficulty in maintaining a symmetrical posture, due to a neurological condition, such as cerebral palsy, brain injury or multiple sclerosis.
<b>Attempt board</b>	The screen on the field of play that displays key information to follow the competition, including the athlete's name, NPC, rack height, the requested lift attempt weight and the lift decision result.
<b>Best lift</b>	The final result of each athlete, determined by the heaviest "good lift" within their three attempts. This is signified by "best" on the scoreboard.
<b>Bodyweight</b>	The weight of the athlete registered by officials during the weigh-in process.
<b>Bodyweight category</b>	The event in which the athletes within the same parameters compete. The upper limit is the category's label (e.g. men's up to 88kg). At the Paralympic Games, there are 20 bodyweight categories; 10 for women and 10 for men.
<b>Call area</b>	The area from which athletes are called to the field of play to perform their lifts, and to which they return after each attempt.
<b>Chief referee</b>	One of the three referees who is responsible to provide the "start" and "rack" commands, judge each athlete's lift and provide the final decision if an error in announcing, spotting or loading occurred.
<b>Classification</b>	To ensure competition is fair and equal, all Paralympic sports have a system in place which ensures that winning is determined by skill, fitness, power, endurance, tactical ability and mental focus, the same factors that account for success in sport for able-bodied athletes. This process is called "classification" and its purpose is to minimise the impact of impairments on the activity ("sport discipline"). Having the impairment thus is not sufficient; the impact on the sport must be proved, and in each Paralympic sport the criteria of grouping athletes by the degree of activity limitation resulting from the impairment are named "sport classes".
<b>Good lift</b>	A lift attempt judged as compliant with the technical lift sequences by at least two of the three referees. This is signified by the white icon on the attempt board.
<b>Hypertonia</b>	An eligible impairment for powerlifting; abnormal increase in muscle tension and a reduced ability of a muscle to stretch, due to a neurological condition, such as cerebral palsy, brain injury or multiple sclerosis.
<b>Impaired muscle power</b>	An eligible impairment for powerlifting; reduced force generated by muscles or muscle groups, such as muscles of one limb or the lower half of the body, as caused, for example, by spinal cord injuries, spina bifida or polio.

## Sport Terminology

Terminologie du sport

As of FRI 23 AUG 2024

Term	Definition
<b>Impaired passive range of movement</b>	An eligible impairment for powerlifting; range of movement in one or more joints is reduced permanently, for example due to arthrogyposis. Hypermobility of joints, joint instability and acute conditions, such as arthritis, are not considered eligible impairments.
<b>Jury members</b>	Three of the technical official positions that judge each athlete's lift. Only if a lift challenge is submitted and their judgement is unanimous can the result be overturned.
<b>Kit check</b>	The process at which each athlete's uniform and personal equipment are verified ahead of their competition. This ensures their items are in accordance with the technical rules and regulations.
<b>Leg length difference</b>	An eligible impairment for powerlifting; bone shortening in one leg due to congenital deficiency or trauma.
<b>Lift</b>	The single bench press movement of the para powerlifting competition in which the athlete assumes a supine position on the bench, taking control of the bar at arm's length with locked elbows, lowering the bar to the chest, holding it motionless, not touching and not sinking on the chest after the initial start command, and then pressing it upwards evenly with parallel timing of the locked elbows until the rack command is received.
<b>Lift challenge</b>	When a no lift is judged, the athlete can submit a technical challenge within one minute of the decision. The judgement is overturned only if all three jury members are unanimous that the lift should have been judged a good lift.
<b>Limb deficiency</b>	An eligible impairment for powerlifting; total or partial absence of bones or joints as a consequence of trauma, illness or congenital limb deficiency.
<b>Lot number</b>	A unique number allocated to each athlete according to the Qualification Ranking List that determines the weigh-in order (from highest to lowest in the bodyweight category), and the lifting order in the case that two athletes request the same lift attempt weight (higher lot number completes the attempt first).
<b>Marshall</b>	The technical official position that accepts lift attempt changes throughout the competition.
<b>No lift</b>	A lift attempt judged as noncompliant with the technical lift sequences by at least two of the three referees. This is signified by the red icon on the attempt board.
<b>No lift – down sequence</b>	One of the technical lift sequences judged by the referees and jury members, concerned mainly about overall control of the bar throughout the lift. This is signified by the blue icon on the attempt board.
<b>No lift – body position sequence</b>	One of the technical lift sequences judged by the referees and jury members, concerned mainly about the grip, hand and body position on the bench. This is signified by the turquoise icon on the attempt board.

## Sport Terminology

Terminologie du sport  
As of FRI 23 AUG 2024

Term	Definition
<b>No lift – stop sequence</b>	One of the technical lift sequences judged by the referees and jury members, concerned mainly about the visual stop on the chest between the downwards and upwards movement of the lift. This is signified by the orange icon on the attempt board.
<b>No lift – press sequence</b>	One of the technical lift sequences judged by the referees and jury members, concerned mainly about the upwards movement of the lift until the elbow lockout. This is signified by the purple icon on the attempt board.
<b>Power lift</b>	An additional lift attempt available to athletes to achieve an eligible record. The result of the power lift counts towards the final result and rankings.
<b>Referee device</b>	Each referee and jury member has a device with five buttons: one white button, pressed if the lift is considered to be a “good lift” and the four buttons (purple, orange, blue and turquoise), representing the “no lift” sequences, each pressed if the lift is considered to be a “no lift” for an element of that specific sequence.
<b>Referees</b>	Three of the technical officials seated at the head, left and right of the bench, respectively who judge each athlete’s lift.
<b>Short stature</b>	An eligible impairment for powerlifting; reduced standing height due to abnormal dimensions of bones of upper and lower limbs or trunk, for example due to achondroplasia or growth hormone dysfunction.
<b>Spotter loaders</b>	Staff who load the discs on the bar, assist the athlete on to and leaving the bench with strapping, and support the safety of the athlete during their lift by shadowing the movement.
<b>Technical controller</b>	The technical official positions that lead the athlete and technical official presentations, manage the calling order and flow of the warm-up area, call area and field of play entrance and exit and verify the athlete’s uniform during the competition.
<b>Technical delegate</b>	The technical official position who oversees the overall competition and ensures the technical rules and regulations are correctly being applied.
<b>Weigh-in</b>	The process during which each athlete’s bodyweight is verified ahead of the competition. This ensures their weight is within the parameters of their registered bodyweight category for the competition.
